

Standards of Practice: Commonly-Used Drugs in Long Term Care a 4-part Webinar Series with

Webinar

2

Developing a Strategic Approach for IV Therapy

Description

In this webinar, the second in a four-part Standards of Practice series with NADONA, we will discuss current standards of practice for IV therapies. We'll cover the dynamics of fluid and electrolyte imbalance, pharmacology, infection control, vascular access devices, hypodermolysis, geriatric considerations, and risk management, including infusion complications.

Learning Objectives

- 1 Review the objectives and components of fluid and electrolyte imbalance
- 2 Discuss the components of site selection (peripheral vs central) due to anticipated length of therapy, PH of drug or fluid, osmolarity of fluid, and availability of venous access
- 3 Discuss common complications of IV and their associated signs and symptoms
- 4 Review geriatric considerations of IV therapy

Tuesday, February 7, 2023 | 1:00 PM ET

Presented by:

Jacqueline Fine Vance, RNC, BSN, IP-BC, CDP, ASCOM, LBBP, CDONA/LTC, FACDONA

Senior Director, Clinical Innovation and Education, Mission Health Communities

Martha Dietz, BSN, RN, CRNI, VA-BC

Lead IV Nurse, PharMerica

This webinar has been approved for 1 participant hour/CEU with NAB/NCERS.
