

## Survey Activity State by State: A Town Hall with DONs and Administrators

### Description

Moderated by NADONA leadership, this forum will provide an overview of survey statistics since the CMS Phase 3 guidance was implemented in October and feature first-hand accounts from DONs and administrators from each region in the country on recent surveyor activity. The panelists will share experiences from their states about which immediate jeopardy citations are being issued so attendees can understand common focus areas of surveyors as well as best practices for responding and steps facilities can take to address noncompliance.

### Learning Objectives

- 1 Identify the number one citation issue in the nation under the new guidance
- 2 Discuss two areas (F-Tags) which have resulted in immediate jeopardy
- 3 Explain two best practices for responding to survey issues
