General Tips for Email Images

- **File Format**

When you save images, use PNG, JPG, or GIF format. You can use PNG format if you need to retain transparency.

- **File Size**

It's best to avoid overly large images, both in file size and pixel dimensions. We recommend a maximum file size of 1MB for images. 72 DPI is generally sufficient for the web, but isn't required. We don't recommend uploading images that are significantly larger than your content area or template.

- **Image Size**

Emails and landing pages have a limited amount of width for images. For specific width recommendations, check out the following sections based on the type of content you're creating.
